“Committed to the health of our forces”

The mission of the NATO Centre of Excellence for Military Medicine (MILMED COE) is to assist the Alliance in improving medical capabilities and medical support to operations, maintaining and enhancing its military relevance and effectiveness and providing subject matter expertise to the military medical community. The MILMED COE also assists NATO and its Partners in optimizing interoperability levels of their medical support system by enabling the various medical services to train and operate together effectively.

There are several military medical journals worldwide and it is reasonable to presume that they are not aware of the existence of each other. Our mission in the MILMED COE is to serve the NATO military medical community by creating a medical knowledge hub and facilitating military medical research, improvement and transformation of the medical support system and medical care.

The MILMED COE has developed this catalogue of Military Medical journals, magazines and publications aiming to:

- Provide the military medical community with an easily accessible source of information
- Identify relevant military journals dealing with Military Medicine
- Create a common platform that might allow the community of interest to exchange information between editors and authors
- Initiate co-operation in the field of expertise by spreading and sharing military medical sciences, knowledge, experience and information
- Facilitate prioritized and focused research projects related to the main domains of interest for the NATO medical community
- Become aware of complementarity and to avoid any unnecessary competition

The extensive information from all technical and organizational areas of military medicine and military pharmacy serves the goal of supporting physicians, dentists, veterinarians and pharmacists/food chemists in their daily work and of promoting the exchange of ideas within and outside the German medical service as well as with foreign medical services.

It is the only journal in Germany to cover all relevant areas: from surgery and internal medicine to dentistry and the laboratory sector. An important role is played by disaster, rescue and emergency medicine, wound treatment, the procurement of the necessary material with drugs, medical devices and medical equipment. The journal is intended for daily work, foreign assignments and questions of organization and leadership.

This scientific publication of the Medical Service of the German Armed Forces publishes contributions ("Full scientific articles" as well as short articles) from the fields of military medicine and military pharmacy including their peripheral areas. The authors (physicians, dentists, veterinarians, chemists, biologists, psychologists and scientists of other disciplines as well as health professionals) are members of institutes, hospitals, other medical service facilities, universities and departments of the German Armed Forces as well as civilian clinics, universities and research institutions, also from abroad.

In addition, the Bundeswehr Medical Service Command reports regularly on events, happenings and outstanding scientific achievements of members of the medical service.

The German Society for Military Medicine and Pharmacy (Deutsche Gesellschaft für Wehrmedizin und Wehrpharmazie e. V.) provides information from its divisional groups and from the Federal Head Office in Bonn.

**EUROPA is moving closer together - in many ways.
This also applies to the armed forces of Europe and here in particular to the cooperation of the medical services.**

International cooperation in the field of military medicine has been tried and tested in many foreign missions; the focus on EUROPA is new. This development will certainly intensify in the next few years. We as Beta Verlag have understood ourselves with our publications, for example the Almanac, which is now available online at www.military-medicine.com as a partner of all medical services and have been accompanying this European process from the very beginning. With this special edition EUROPEAN MILITARY MEDICAL SERVICES we give a forum for European cooperation and report on closer European cooperation moreover the foundation of the "European Medical Command" and on its medium-term planned development. Since then, we give you a detailed insight into the military medical services of the nations that have been part of it from the very beginning and also of new nations that have joined.

www.jmvh.org

The Journal of Military and Veterans' Health is the official journal of the Australasian Military Medicine Association www.amma.asn.au. It is a peer reviewed journal dedicated to supporting the publication of research and information on military medicine and veterans' health, recognising that the impact of military service translates into health effects on military personnel long after they retire.

It provides and promotes information for those health professionals who are working in, researching or have an interest in the unique facets of medicine and health of military personnel and veterans. The JMVH Editorial Board oversees the publication of the journal which is distributed quarterly. The Board has representatives from the Australasian Military Medicine Association, the Australian Defence Health Services, the NZ Defence Health Services, the Department of Veterans' Affairs, the Centre for Military and Veterans' Health, and several universities. A majority of Board members have appointments with Universities which are heavily involved in military and veterans' health research.

JMVH welcomes submission of Articles in the form specifies in the authors guidelines. All contributions will be subject to peer review.

Sanidad Militar is the health journal of the Spanish Armed Forces. It is a scientific and technical journal that was founded in 1851 under the name of Biblioteca Médico Castrense Española. Since then it has been published as regularly up to the present.

Since 2002 it has a quarterly periodicity and it is in 2007 when it changes its name to Sanidad Militar as it is known today. The Sanidad Militar journal aims to publish articles on health sciences, specially those that refer to the military.

Medicine (RJMM) is a medical review founded in 1897, under continuous improvement and development following the rigours of modern medical publications. It is published under the auspices of Romanian Association of Military Physicians and Pharmacists but widely opened to the worldwide scientific community.

The Romanian Journal of Military Medicine is national, open access, peer-reviewed journal that publishes scientific articles on a broad range of topics not only in military medicine but also in related specialities. The aim of the journal is to disseminate the latest developments in the field to physicians concerned with progress in medicine, and advance the understanding of complex diseases and their treatments, based on the most recent clinical and pathological experiments.

RJMM is both a source of information for continuous medical education and a necessary tool in the development of new clinical strategies that use a modern multidisciplinary approach.

The journal publishes original papers, literature reviews, case reports, short reports, case series, clinical images, as well as editorials written by internationally recognized scientists and researchers working in the broad field of military medicine and related specialities.

The material is available online as well as in print.

All manuscripts submitted to RJMM will be reviewed by its Editor-in-Chief, and will also be blind-reviewed by a minimum of 2 to 3 additional reviewers.

Military Medical Science Letters (Vojenské Zdravotnické Listy) is a national professional journal of military doctors, pharmacists and veterinary doctors with a long tradition.

It is the oldest military journal in the Czech Republic, first issue of which was published in April 1925. The journal is mainly aimed at military doctors of all specializations, military pharmacists, veterinary doctors, researchers, members of the integrated rescue system units and other qualified personnel.

The journal informs about research results in the field of military health care. It presents results about preventive, diagnostic and therapeutic activities. Last but not least, it is a significant resource of experience from the practice of the Czech Armed Forces Medical Service. Not only does the content inform readers about professional practice in times of peace, but also readers have a possibility to look into the war zone practice.

Contributions from all medical branches, pharmacy, veterinary medicine, medicinal chemistry, the nursing field and other areas, focused mainly on military health care, are welcome to be published in Military Medical Science Letters. All submissions undergo a regular review procedure. Manuscripts are accepted in English or in Czech/Slovak language.

TRAUMA AND ACUTE CARE SURGERY

Print 2163-0755, Online: 2163-0763
USA - English

Ernest E. Moore, MD
(Editor in Chief)

Email: info@jtrauma.com

<https://journals.lww.com/jtrauma/pages/default.aspx>

The Journal of Trauma and Acute Care Surgery® is designed to provide the scientific basis to optimize care of the severely injured and critically ill surgical patient.

Thus, the Journal has a high priority for basic and translation research to fulfill this objectives. Additionally, the Journal is enthusiastic to publish randomized prospective clinical studies to establish care predicated on a mechanistic foundation. Finally, the Journal is seeking systematic reviews, guidelines and algorithms that incorporate the best evidence available.

A Military Health System Research Symposium Supplement to the Journal of Trauma and Acute Care Surgery is issued on a yearly basis.
